SUSTAINABLE MERCHANDISE

- FSC and PEFC certified wood fiber.
- Sustainable Merchandising.
- 100% recyclable.
- Manufactured in Alquerías - Castellón - Spain.
- Original, personalized and exclusive designs for each client.
- Direct digital printing on the highly durable surface.
- Laser cut, cauterized edges.

TRADITION + PASSION + ECO-INNOVATION = VISUALLY

We have been working with wood since 1932, this has been the basis of our family business for the last 90 years, always using the same raw material.

We shape your idea with infinite possibilities, turning it into a quality product with high added value.

Direct HD digital printing on wood fiber.

Digital printing means that we can customize each job in an original, different and exclusive way with finishes that simulate, wood, metals, colors, etc., in short, infinite possibilities that in the end get the exhibitor to distinguish the brand and give a greater cachet to the products it exhibits, maintaining a perpetual quality like that of the first day.

The use of this printing technique avoids the use of clichés that in the end are useless waste, compared to the efficiency and maximum quality offered by digital printing.

It is an immense satisfaction for us to see the result achieved by having well focused the combination of these innovative technologies together with our patented system, allowing us to generate unique and exclusive products for each client in multiple sectors, these being sustainable, ecological, reusable, using the minimum necessary raw material, as well as reduced electricity consumption.
